## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 14 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

3. Claims 12 and 19-21 are drawn to a method/apparatus for reading data stream in two opposite directions. In order for a claimed invention to be considered statutory under 35 U.S.C. 101, it must be useful and accomplish a practical application. That is, it must produce a "useful, concrete and tangible result" (*State Street*, 149 F.3d at 1373-74, 47 USPQ2d at 1601-02). In the present case, the final result of claims 1 and 19-21 only refers code words resulted from the reading of data stream in two opposite directions and not the actual tangible signal outputted to the speakers or display. As such, claims 1 and 19-21 are directed to non-statutory subject matter. The dependent claims fail to overcome the 35 U.S.C. 101 rejection directed towards independent claims 1 and 19-21, and thus, are also directed to non-statutory subject matter.
